I ordered the room shock quick release treatment in order to deal with the cigarette smoke odor left by a tenant who had smoked in a rental apartment for nearly two years. After scrubbing down the walls and ceilings and repainting, and then throwing away the blinds, light bulbs, carpeting, and anything else that was removable, the apartment still smelled of cigarettes. I used room shocker in each room of the apartment over a three day period, and I could not thereafter detect any lingering smell of cigarettes. Good product!

We had a feral cat that entered our summer trailer and used it as a litter box all winter long. When we went to open the trailer in April, we almost died from the smell! We cleaned everything up, but the urine odor was so strong we thought it was hopeless. I came across your site when I googled "my house smells like cat pee" and one woman said she used for skunk odors. Then I started googling room shocker and read about it. This was our last hope!! It worked beautifully. It is over a month now and the odor has not returned!! Thank You for making such a wonderful product. I wish you would sell it at Pet Smart or a Home Depot. Thank You so much again!!

I used the Room Shocker a few months ago. Really thought I wasted my money. And it's not cheap! I had a musty/mildew smell in my bedroom for over a year. Tried everything, bleach, household sprays, bottles of borax, and too many other remedies that didn't work. We set a Room Shocker up in the bed room and went shopping for about 6 hours. Came back and not only was the odor gone but the room smelled really great. Of course we vented the room before sleeping in it. I would recommend this for anyone needing to get rid of any odor. I'd almost want to get sprayed by a skunk to see if that one works:) If you got an odor you want to get rid of use this stuff, it really works. Vinny

I recently quit smoking. After being quit for a while I started to smell a lingering smoke odor in my car. I saw the money back guarantee and decided to try it. To my amazement, my car still smells fresh with no smoke odor after several days. Well worth it. Thanks.

Trying to sell my house, I received comments that the odor of cigarette smoke in the house was a deterrent for potential buyers. After considering other expensive conventional methods of odor elimination, I researched the problem on line. Purchased RoomShocker on line and I'm amazed at the results. All odors have been completely removed. And the process is so simple. It is an unusual pleasure to find a product which does exactly what it's promoters claim. Congratulations on a fine product!!
