

Room Shocker™ INSTRUCTIONS

For use in enclosed spaces of up to 400 sq/ft with an 8 ft ceiling.

Read all instructions before using!

In order to guarantee success, follow all directions **exactly as indicated**

1. Close all windows, curtains and shades in order to block out all sunlight and eliminate drafts. Sunlight/UV rays weaken Chlorine Dioxide strength.
2. Open container and remove all contents
3. Read all information on foil packet then open packet at notch edge carefully so as to not damage content inside. Remove the CLO2DMG Technology™ pouch from inside and discard desiccant.
4. Take the CLO2DMG Technology™ pouch and shake thoroughly to help loosen and mix ingredients. Then place pouch back in the container provided.
5. Place container on a stable flat surface in center of room to be treated, for additional safety place on a plate or container lid to prevent damage from

spillage, staining or bleaching. **Do not place container directly on carpet. Do not apply when carpet is wet.**

6. Using measuring cup provided add one full measuring cup of warm tap water over pouch to activate. **Do not put lid back on container** until treatment is over and product is ready to be discarded.
7. Close and lock all doors and windows to prevent others from entering the room while the product is working. **This product is completely nontoxic however it is an irritant, therefore there should be no persons or pets in the room while the Room Shocker™ is activated and in use.**
8. Leave the Room Shocker™ working for a minimum of 10 to 24 hours depending on severity of odor.
9. At end of treatment open all doors and windows for ventilation, and place lid back on the Room Shocker™ and dispose in an outdoors waste container.
10. Allow rooms to ventilate for 40 minutes before entering.

TIPS: In order to ensure optimal performance, you may want to follow these tips.

- a. Before using Room Shocker™, make sure all cabinets, drawers and closets are open. This will

ensure that all tough odors are reached by the Room Shocker™ especially cigarette smoke odors.

- b. Use one Room Shocker™ for each room in the home being treated.
- c. Turn off all AC and heating systems.
- d. If you are in a building, make sure you cover all air intake vents.
- e. If using in a basement, it must have a full foundation or it will not work.
- f. Odor source must be removed prior to use, such as dead animals in crawl spaces or fixing leaks.
- g. To clean out air ducts, remove filter from the air intake and place a Room Shocker™ next to intake.
- h. Before step 9 turn on fan to flush out the air ducts for 15 minutes.
- i. Minimum temperature for Room Shocker™ to work most effectively must not be below 50 degrees Fahrenheit.
- j. Single Room Treatment; When treating a single room, make sure that space being treated is completely sealed off in order to maintain chlorine dioxide vapor within the confined space. In an open floor plan, you can use disposable painters plastic tarp and painters masking tape to seal off the area being treated from the rest of the house.

For money back guarantee policy please hold onto foil packet and refer to our FAQ on our website.

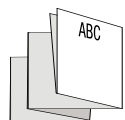

Room Shocker™ is a safe and non-toxic product that will degrade into a saltwater solution. All components are biodegradable and eco-friendly. Made in the USA.
